

The Belgian Luxembourg Chamber of Commerce (BLCC) is thrilled to announce PAGS as the recipient of the **"Rising Star"** award at the prestigious Golden Bridge Awards 2023. This Award celebrates small standout Belgian and Luxembourg companies excelling in their ventures within the UK.

Founded with a mission to address critical but often under-acknowledged aspects of education for neuro-diverse learners, PAGS has rapidly established itself as a transformative force in the educational sector. Their comprehensive SEN (Special Educational Needs) management system, PAGS, streamlines administrative tasks for schools, allowing educators to dedicate more time to learner support. By empowering teachers and SEN professionals with scientifically-validated assessments and customisable strategies, PAGS provides a holistic view of each learner's strengths and developmental needs, setting a new standard in personalised education.

Though PAGS is at the start of an impactful journey, they have already achieved key milestones like its partnership with IRIS and the recent launch of its platform on Salesforce. These steps expand PAGS' reach and enable seamless integration of its innovative SEN solutions, setting a strong foundation for transforming special education. PAGS' growth strategy has involved building a team of experts with deep experience in SEN. This team has been instrumental in PAGS' commitment of personalised education. As PAGS continues to innovate and expand, the company is set to shine even brighter, advancing the future of SEN management and positively impacting schools and learners worldwide.

The "Rising Star" award recognises PAGS' impressive achievements and the positive impact they are creating in the field of special education, as well as their continued journey toward growth and success.
