

The BLCC has proudly awarded the Golden Bridge for **'Social Impact'** to PAGS, a company devoted to creating meaningful, transformative change within special education. This award highlights PAGS' commitment to a vital and often overlooked area, providing groundbreaking solutions to improve the educational experience and outcomes for neuro-diverse learners.

PAGS is dedicated to making a positive impact on the lives of students with special educational needs (SEN), their families, and educational institutions. With a mission to simplify and enhance SEN support, PAGS offers a 360° management system designed to streamline administrative work and allow educators to focus more on individual student needs. Their innovative platform includes a holistic approach to assessing and addressing each learner's strengths and developmental needs, empowering educators to deliver tailored interventions and foster growth in areas like communication, social interaction, and self-regulation.

Despite being a relatively new company, PAGS is already making significant strides. Their tools save schools over 20 hours of administrative work per term per learner, helping educators prioritise teaching over paperwork. PAGS' system is scientifically validated and follows best practices, simplifying complex processes and enabling educators to seamlessly monitor, track, and support learner development across various skill areas. PAGS' approach ensures neurodiverse children receive individualised attention and personalised goals, removing barriers to academic success. They are transforming the educational landscape through these innovative tools with the goal of supporting neuro-diverse learners in a mainstream classroom. .

The Golden Bridge Award for Social Impact celebrates PAGS' dedication to addressing critical educational gaps, reinforcing its positive contribution to the future of SEN support worldwide.
