

Silverfin has been awarded the prestigious BLCC Golden Bridge Award for "**Innovate and Elevate.**" This accolade recognises the innovative advancements made by Belgian and Luxembourg companies that are shaping the future of their respective industries.

At Silverfin, they are committed to transforming the accounting landscape with their cutting-edge cloud software designed specifically for accounting firms. Their platform streamlines core accounting processes, enabling firms to access real-time client data that flows seamlessly into best practice working papers. By utilising AI data mapping, they enhance accuracy and improve access to essential information.

Their solutions allow accounting teams to prepare year-end accounts and manage corporation tax submissions in significantly less time through automation. Their strive to create an innovative cloud platform through the use of AI has revolutionised the accounting industry by enhancing accuracy, streamlining workflows, and enabling firms to deliver value-added services to their clients. Silverfin's innovative approach also extends to accounts production. Their intelligent AI-powered Assistant continually analyses client data to identify outliers, errors, and opportunities, streamlining the accounting process and cutting down on time-consuming manual checks. With more than 900 customers across 17 countries, Silverfin is at the forefront of the digital transformation in accounting, providing constantly evolving technology and tools needed for firms to thrive in a rapidly changing environment.

The Golden Bridge Award for Innovate and Elevate highlights Silverfin's dedication to empowering accountants and reshaping the future of the accounting profession through innovation and connectivity.
